

# MUSKY HUNTERS IN NORTH AMERICA

A fish that is growing in popularity, the muskellunge is now found in 32 states and four provinces in natural or stocked fisheries. Light blue shaded regions indicate the musky's 2011 range. Dark blue shaded areas represent states and provinces that make up 3% or more of Musky Hunter's readership. Numbers represent the percentage of Musky Hunter magazine readers found in each state. (States with less than 1% of MHM readership are not indicated.)
